STRENGER

A member of the EMKA Group

STRENGER is the reliable partner when it comes to progressive locking solutions for buildings. STRENGER develops and manufactures products for a wide range of plastic, wood, metal and glass applications, from simple latches to complex locking mechanisms.

London's "The Shard" is the tallest glass building in Europe and, with over 5,000 window fittings from STRENGER, is impressive proof of the flexibility and technical expertise with which the company meets even the highest demands.

Whatever project has to be realized - from STRENGER there is the right product for every demand. As one of the leading manufacturer of latches in Europe with meanwhile 180 years of experience, STRENGER offers an extensive standard program as well as custom-made products for many fields of application.

The technical know-how and the quality of "Made in Europe" also makes STRENGER an internationally sought-after specialist.

180 years
